*The Tasmanian Department of Health and Human Services seeks a Deputy Chief Radiation Oncology Medical Physicist for a key role at the Royal Hobart Hospital which is located in picturesque southern Tasmania.*

This role offers you the opportunity to be at the forefront of a high quality, comprehensive medical physics service through the Hospital's Department of Radiation Oncology. Your substantial practical experience in radiation oncology physics will be highly valued, along with your ability to provide expert advice on safety and other aspects of radiation physics.

Joining a dedicated team of professionals, the W.P.Holman Clinic provides a cancer treatment service for a population of approximately 240,000. The Clinic continues to expand its range of the latest technology and currently has:

- two Varian multi-modality linear accelerators both with MLC and EPI

- a linear accelerator with CBCT and respiratory gating functionality
- a Philips Big Bore CT and a Gulmay superficial X-ray therapy unit.
- a Philips Pinnacle3 planning system with ARIA Record and Verify.

In this role you will benefit from a broad spectrum of rewarding work and a close knit and welcoming team. At play you will achieve an unbeatable lifestyle free of the congestion in today's big city life but with all the services you need to create a safe, vibrant and happy home. Come and join us in a flexible work environment where high quality work and high quality life are both strongly valued.

We offer:

- relocation assistance and visa support
- ongoing professional development opportunities
- excellent restaurants, local produce,

- entertainment options and affordable real estate
- World Heritage hiking trails, wilderness river rafting and pristine beaches on your doorstep
- easy access to Sydney and Melbourne and with daily flights.

Salary is negotiable based on skills, qualifications and experience plus superannuation and access to salary packaging. Preference will be given to applicants with relevant postgraduate qualifications and ACPSEM Accreditation in Radiotherapy Equipment Commissioning and Quality Assurance or equivalent.
