

IBA PROTON THERAPY RECRUITS CLINICAL SOLUTION MANAGER

Job Description

You will be part of the clinical solutions team, a team of medical physicists, responsible for defining and following up the clinical roadmap and priorities of the proton therapy system portfolio.

Your role and responsibilities:

- Be the representative of the proton therapy system user within the company.
- Contribute to the clinical evolution of our proton therapy products, through their whole life cycle, and you develop a profound knowledge of this product line.
- Contribute to the product roadmap and define user requirements for new functionalities.
- Support R&D with your clinical knowledge to ensure the functionality will fit the user's needs as well as by feeding back customer experience.
- Analyze the market, customers' and other stakeholders' needs, and you ensure clinical, market and business opportunities are communicated internally.
- Support the marketing and sales team with your in-depth knowledge of the clinical use of system.

Profile

- A Master degree in Medical Physics or Biomedical Engineering, or an equivalent experience.
- At least 4 years of experience in the radiotherapy field as a Medical Physicist or equivalent.
- Experience in a medical device company is a plus.
- Knowledge of user software as an asset.
- A customer-oriented person with excellent interpersonal communication skills including presentation of ideas.
- Passionate about delivering innovative solutions to the market
- Demonstrating a rapid understanding of newly presented information.
- Fascinated by new technologies and always willing to update your knowledge.
- A proactive person willing to take initiatives.
- Fluent in English.
- A team player able to organize your work autonomously according to priorities
- Willing to travel up to 20% of your time and ready to relocate in Belgium if you live abroad
