

CONFERENCES

16th PSI Winter School for Proton Therapy

15 - 20 January 2023, Villigen PSI, Switzerland

Everything you always wanted to know about the why and how in radiating cancer with protons

The Paul Scherrer Institute (PSI) Winter School for Proton Therapy is a four day course given by experts of the Center for Proton Therapy in Switzerland and their colleagues worldwide. It provides detailed knowledge on the clinical, physics and technological aspects of proton therapy using pencil beam scanning.

This course is of interest to radiation oncologists, medical physicists, physicists, engineers, radiation therapists and dosimetrists. No previous knowledge of proton therapy is necessary.

The Winter School will be credited with European CME credits (ECMEC®s).
