

CONFERENCES

HITRIplus seminar: “Transnational Access and Clinical Aspects”

21 June 2021, 17.00 to 18.00 CET, Online

We would like to take this opportunity to inform you that the EU-funded infrastructure project HITRIplus <https://hitriplus.eu/>, is organising its first opening seminar on “Transnational Access and Clinical Aspects” on **Monday, June 21, 2021 from 17.00 to 18.00 CET via Zoom**. We have invited Centro Nazionale di Adroterapia Oncologica (CNAO), as the Coordinator of the project, to launch the monthly seminar series. We would be delighted if you can spare some time to attend.

We would like to engage the particle therapy community in these monthly seminars and would welcome suggestions for speakers for the future. Please forward and share this information with those who might be interested in attending the seminar.

Information on the seminar can be found at: <https://indico.cern.ch/event/1048042/>. We kindly ask you to register.

With best wishes

Manjit Dosanjh
ENLIGHT Coordinator, <http://www.cern.ch/enlight>
HITRIplus Networking Activities Pillar Coordinator, <https://hitriplus.eu/>
