## Heavy Ion Therapy Masterclass School

**17-22 May 2021, Online**

We would like to invite you to the Heavy Ion Therapy Masterclass School with a focus on Therapy Treatment Planning Systems which will be taking place online between the 17th and the 22<sup>nd</sup> of May 2021.

This school is intended for students and early-stage researchers to learn alongside and become a part of the heavy ion therapy research community which is growing across Europe.

Registration is free and participants will be able to attend daily lectures on a wide range of topics pertaining to particle therapy, accelerator physics, medical accelerators, and radiobiological physics. Furthermore, training will be provided for the simulation code matRad, a treatment planning radiotherapy software.

In addition, the masterclass is an opportunity to network with other students and leading researchers, with social events organised each evening.

To learn more about the masterclass and to register for the event, please visit our webpage  
<https://indico.cern.ch/event/1019104/>

Please share this message with students or researchers who you believe will be interested in this opportunity! This project has received funding from the European Union's Horizon 2020 Research and Innovation programme under grant agreement no: 101008548 - HITRI<sup>plus</sup>.

Kind regards,
