

# CONFERENCES

## THINK HADROM - discovering Hadrontherapy within Multidisciplinarity

**Webinars: 21 Nov & 12 Dec 2022, 15 Feb 2023**

Centro Nazionale di Adroterapia Oncologica

CNAO the National Center for Oncological Hadrontherapy, is one of the only six center in the world **using both protons and carbon ions to treat complex tumours.**

I have the pleasure to invite you, together with Accademia Nazionale di Medicina, to be part of our cycle of three webinars titled: **"THINK HADROM - discovering Hadrontherapy within Multidisciplinarity".**

The project will face current methodologies to evaluate the sustainability of hadrontherapy going through the pre-clinical and clinical experiences, and the current approaches used to qualify patient to hadrontherapy treatments. As for other radiotherapy approaches, the multidisciplinary collaboration is of utmost importance for the patient benefit. Moreover, National and International Networks and Cooperation are the keys to build clinical evidence for hadrontherapy.

The webinars will be held on the following dates:

- **November 21th** (h 15:00-18:05);
- **December 12th** (h 15:00-17:30);
- **February 15th**, 2023 (h 15:00-17:45).

Please find attached the full programme. You can register your presence directly from the following link:  
<https://fad.accmed.org/course/info.php?id=1044>

I strongly hope to have you on board.  
My best regards,

**Ester Orlandi**  
Radiation Oncologist  
Head of the Clinical Department, CNAO  
National Center for Oncological Hadrontherapy  
Pavia, Italy
