

MULTIMODAL CANCER TREATMENT

General

Evidence Based Radiation Oncology

Immunotherapy

MULTIMODAL CANCER TREATMENT

Site Specific

Multidisciplinary Management of Head and Neck Cancer

Multidisciplinary Management of Lung Cancer

Multidisciplinary Management of Non-Melanoma Skin Cancer

Haematological Malignancies

BIOLOGY

Basic Clinical Radiobiology

IMAGING

Target Volume Determination

Advanced Imaging in Radiotherapy: Current use, Future developments, and the Integration of AI

BEST PRACTICE

Foundation of Leadership in Radiation Oncology

Comprehensive Quality Management in Radiotherapy – Risk Management and Patient Safety

RT TREATMENT, PLANNING AND DELIVERY

External Beam

IMRT and VMAT: Best Practices and New Trends

Positioning and Immobilisation for Radiation Therapy

Advanced Treatment Planning

Advanced Skills in Modern Radiotherapy

Physics for Modern Radiotherapy

Particle Therapy

Dose Modelling and Verification for External Beam Radiotherapy

MR-LINAC Radiotherapy

Implementation and Practice of Image-guided Stereotactic Body Radiotherapy

Masterclass in Stereotactic Body Radiotherapy

Image-guided and Adaptive Radiotherapy in Clinical Practice

RT TREATMENT, PLANNING AND DELIVERY

Brachytherapy

Comprehensive and Practical Brachytherapy

Advanced Physics for Brachytherapy

Image-Guided Radiotherapy and Chemotherapy in Gynaecological Cancer

RESEARCH

Quantitative Methods in Radiation Oncology
