

## MR Excellence Programme Manager

### Location info:

The Affidea MR Excellence Program (MREP) Project Manager can be based in any of Affidea countries or beyond and the job requires substantial travelling.

Are you looking for an opportunity to join a company where you will have a chance of taking part in the innovative program setting new medical standards? Are you interested in leading a holistic international project combining medical know-how with lean methodology and dedicated implementation teams and clinician engagement?

### The role:

We are looking for a Project Manager of Affidea MR Excellence Program (MREP) to enhance our Medical Management Team with project capabilities needed in execution of our strategic clinical projects. MR Excellence Program is a program to unify and optimise the examination protocols across a range of systems and vendors, developing of a fit-for-purpose analytics tool to achieve workflow optimisation and therefore improve the quality of service. The role reports to Affidea Chief Medical Officer.

### Main purpose of the role:

As a key member of our Medical Management Team, the Project Manager is

accountable for executing the international MR Excellence Program with the goal to implement it in diagnostic imaging centres across 14 Affidea countries. He/she will participate in the strategy development and planning of the MR Excellence Program.

### Main responsibilities include:

- Develop the plan for the international implementation of the MR Excellence Program
- Liaise with Country Managers and Country Medical Directors in order to implement the Program
- Prepare the roll out countries for the MR Excellence Program implementation
- Project manage the roll outs of the MR Excellence Program to the Affidea MRI install base in line with the project plan and agreed budget
- Manage the country project teams and support them in delivering the Program on time and aligned with the strategic goals
- Provide regular and comprehensive feedback to the Chief Medical Officer and MR Excellence Program Director
- Manage different streams of the Project in multiple countries simultaneously
- Manage the Central Affidea MR Excellence Team
- Manage change management activities related to the Program during the local implementations
- Transfer the best implementation practices across the roll out countries
- Follow up with KPIs and prepare corrective actions to ensure program success in interaction with the local teams

- Visit sites in different countries where program is implemented, and revisit sites in case of need as a post Go-live monitoring
- Liaise with external partners who support the project implementation
- Ensure sustainability of the MR Excellence Program in the countries
- Manage MR Excellence Program documentation

#### Required experience and skills:

- Experience in the healthcare environment
- Proven project management experience in an international and multicultural environment
- Fluent English and experience in working in the English language
- Understanding of engineering, healthcare IT and Lean Management
- Understanding of magnetic resonance imaging would be an advantage

#### Key competencies:

- Excellent organizational and project management capabilities
- Communication and interpersonal skills
- Influencing and leadership competencies
- Ability to work in a multicultural environment
- Enthusiasm, empathy, trustworthiness
- Strong presentation abilities
- Ability to manage multiple projects simultaneously

#### Additional information:

The Affidea MR Excellence Program (MREP) Project Manager can be based in any of Affidea countries or beyond and the job requires substantial travelling.

#### What we offer:

- An opportunity to be an active part of the Senior Management Team, leading clinical projects and initiatives on an international level
- Being part of setting innovative and consistent standards being industry best practice
- Working in a fast-developing, international healthcare services company that craves outstanding career development opportunities
